

Manage Your AI. At Scale.

**AI Management System (AIMS),
built for AI Trust, Risk, and
Security Management (TRiSM)**

AI System-of-Record

Establishes a trusted, centralized source for all AI-related data, systems, and documentation.

Law & Regulation Tracking

Helps agencies track, interpret, and align AI systems with applicable laws, policies, and regulations at the federal, state, and global levels.

Governance & Compliance

Provides a structured system for aligning AI operations with policies, risk thresholds, and regulations.

Evaluator-Driven Assurance

Uses built-in evaluators to assess AI system quality, including readability, relevance, bias, and risk, aligned with Trusted AI Risk and Security Management (**TRiSM**) practices for measurable, testable oversight.

Performance Monitoring

Tracks AI system performance in real time to validate that models function as intended in production.

Model Drift

Automated detection and alerting of model performance degradation over time.

Alerting & Ticketing

Real time notifications and alert routing to platforms like Jira or ServiceNow for escalation.

Audit & Transparency

Enables system-wide visibility with detailed logs and reports to support oversight, accountability, and responsible AI use.

CORE CAPABILITIES

PROCUREMENT & LIFECYCLE MANAGEMENT

AFFIRM enables a repeatable, risk-based approach to AI procurement. Agencies can standardize vendor evaluation, acquisition, and onboarding while continuously tracking performance, risk, and compliance throughout the AI system's lifecycle, ensuring scalable and responsible deployment.

AI USE CASE & SYSTEM INVENTORY

AFFIRM helps create a living inventory of AI systems by mapping models, tools, data, and use cases. It gives agencies full visibility into their AI landscape, tracking ownership, risk, usage, and alignment with mission priorities.

AI GRC & REGULATORY COMPLIANCE

AFFIRM simplifies internal and external compliance with built-in framework packs aligned with NIST, ISO, **TRiSM** aligned principles. It supports traceable documentation, structured oversight, and audit-readiness for AI systems.

CONTINUOUS AI SYSTEM MONITORING

AFFIRM continuously monitors AI models in production for hallucinations, explainability, toxicity, drift, and other quality indicators. This ensures reliable outputs, early detection of performance issues, and sustained operational integrity.

ANALYTICS, REPORTING & AUDIT SUPPORT

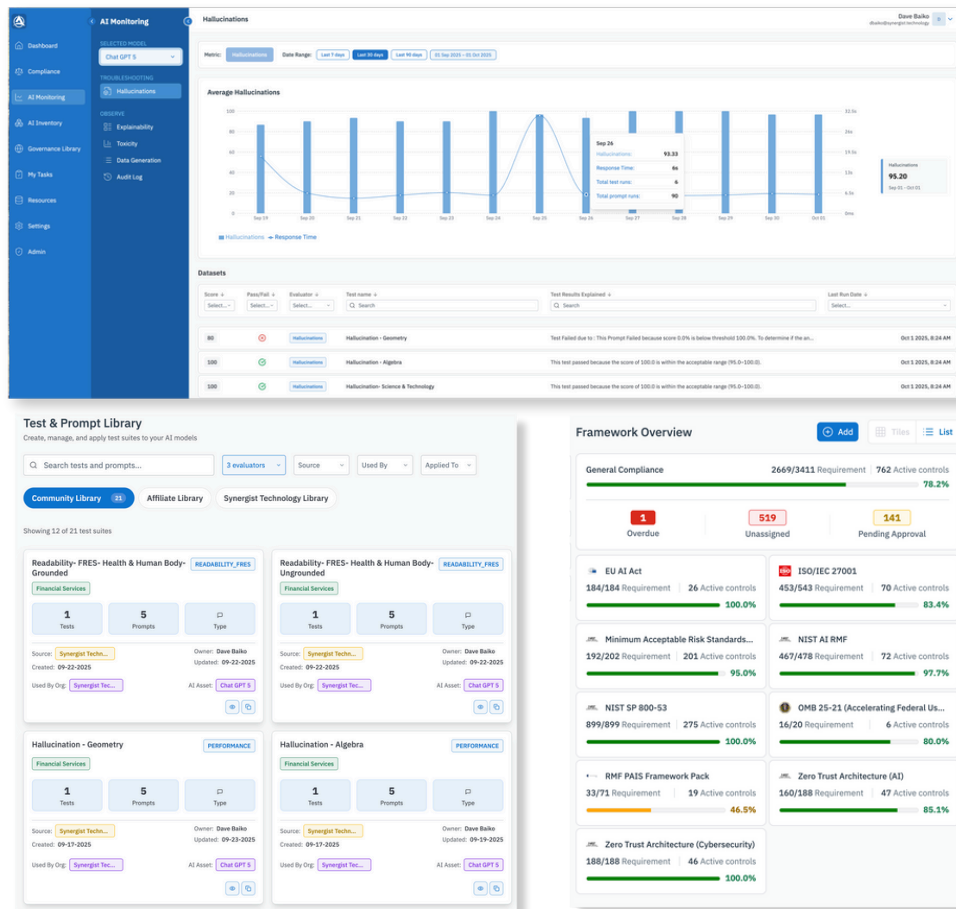

AFFIRM streamlines oversight with one-click audit-ready reporting across the entire AI ecosystem. It compiles reports on inventory, compliance, performance, and procurement, empowering agencies to meet transparency and accountability requirements with ease.

AFFIRM
AI TRUST, RISK, AND SECURITY MANAGEMENT

"AI is at an inflection point, to scale significantly, a platform like AFFIRM is absolutely necessary. They help mitigate risks & AI specific threats which is foundational to success."

— Anil Cheriyan, AI Cybersecurity Leader and former CTO, CIO

CUSTOMER-FIRST DESIGN

- Scalable architecture supporting enterprise-wide deployments
- Cloud-native SaaS delivery with on-premises integration options
- Purpose-built for client customization
- Isolation and customization available with single tenant & multi tenant options
- Native integration with systems and protocols

CONTINUOUS OPTIMIZATION

Structured Engagement Timelines
Governance and Compliance
Framework Packs
Dynamic Prompt Engineering
**24/7 Support
Help Desk**

INDUSTRY SPECIFIC SOLUTIONS

- Federal Agencies
- Department of War (DOW)
- State & Local Government
- Critical Infrastructure & Utilities
- Highly Regulated Industries
 - Healthcare
 - Financial Services
- Enterprise & Fortune 500 Companies

REGULATORY ALIGNMENT

- NIST, ISO, EU AI Act, GDPR, & more
- Pre-Built AI standards & state framework packs
- Master Control Mapping-allowing for one-to-many compliance frameworks
- Industry-specific workflow for compliance requirements
- Verification of 3rd Party AI Model Accuracy & Compliance.

KEY USE CASES

- AI inventory & use case mgmt.
- Compliance to standards & policies
- Continuous AI system monitoring
- AI procurement risk scoring and vendor evaluation
- Mitigation support through partners for remediation
- SIEM and incident response capabilities
- Integration into legacy GRC platforms
